Over 65,000 Babies Born Thanks to

Egg Donation

IVI Fertility

This guide is designed to help you clear up any doubts you may have and to answer the most frequently asked questions-so you can take that next step toward making your dream of becoming a mother come true

The Treatment

Egg donation offers women who are unable to conceive with their own eggs the chance to fulfill their dream of becoming mothers.

This process is made possible thanks to donated eggs. It’s a treatment that more and more women are turning to, and at IVI it boasts a success rate of 99%.

Why Choose Egg Donation at IVI

1.

A Large Egg Bank. Better Match

We have one of the largest egg banks in the world, making it easier to find a compatible donor and to select the one who most closely resembles you. And all this, with no waiting list.

2.

Biometrics. Stronger Physical Resemblance

Our Perfect Match 360° technology ensures genetic compatibility between donor and recipient and also achieves the highest level of physical and biometric similarity, thanks to state-of-the-art facial recognition software. Among all compatible donors, we'll choose the one who looks the most like you.

3.

Genetic Screening. A Healthy Baby

The Carrier Expanded genetic screening test uses the latest DNA sequencing technology to analyze mutations associated with inherited diseases.

4.

Artificial Intelligence. Better Embryo Selection

We're pioneers in using Artificial Intelligence to select chromosomally normal embryos with 90% accuracy and with IA EMBRYOSELECT technology with time-lapse we can optimize embryo culture conditions to support development.

5.

Specialized Emotional Support. Greater Peace of Mind

The wellbeing of the future mother is essential to treatment success. That's why we have a highly qualified Emotional Support team to guide and accompany you through every step of the journey.

Is Egg Donation Right for Me?

Egg donation is recommended for:

- Women with poor egg quality
- Women of advanced maternal age
- Women experiencing ovarian failure or spontaneous absence of periods due to menopause
- Women who have had repeated failed IVF cycles

High Demand. 32% of all treatments we perform involve egg donation.

Specialized Unit. We have a dedicated unit with extensive experience.

Experience. A long track record supporting women through this process.

How to Get Started

If pregnancy hasn't happened naturally, the first step is acknowledging that there might be an underlying issue. Once that's accepted, the next step is to schedule a first consultation with a specialist to understand what's going on.

At your first appointment at an IVI clinic, our fertility specialists will carry out a personalized assessment. This includes a complete gynecological evaluation and, for heterosexual couples, a semen analysis.

Once we have a diagnosis, your medical team will walk you through the assisted reproduction treatments best suited to your case, explain the entire process, and outline the next steps.

How to Get Started

Phase 1

1. First Visit

2. Informative Session

3. Medical History

Phase 2

4. Second Visit

5. Psychological Assessment

6. gynecological Testing

7- Additional Medical Tests

8. Genetic Testing

9. Biometric Scan

Phases of Egg Donation Treatment

1. Endometrial Preparation

Hormonal medication is used to thicken the endometrium, preparing it for embryo implantation and pregnancy.

2. Embryo Transfer

Embryos created from donor eggs are transferred into the recipient's uterine cavity. This step is carried out through IVF/ICSI.

3. Pregnancy Test

Performed approximately 11 days after the embryo transfer.

How Donors Are Selected

At IVI, we have one of the largest egg banks in existence. Using our Perfect Match 360° program, we identify a donor who matches the following criteria:

- Blood type and Rh factor compatible with the recipient
- Phenotypic characteristics similar to the recipient (height, skin tone, eye color, hair color, etc.)

Donors are always assigned based on maximum possible resemblance to the recipient. Physical traits cannot be chosen.

Treatment Cost

At IVI, every patient is unique. We prioritize personalized diagnostics to maximize success, so the final cost depends on the specific tests needed to assess each case.

Ovodon BASIC package: Included Services

First Psychological Visit	1
Unlimited ultrasound monitoring during cycle	Unlimited
Hormone testing during cycle	Unlimited
Semen analysis + semen cryopreservation	1
Donor stimulation & retrieval (includes IVF lab)	1
ICSI (intracytoplasmic sperm injection)	1
Donor treatment	1
Day-5 embryo culture	1
Embryo transfer	1
Pregnancy test (BhCG)	Unlimited
Pregnancy test results consultation	1
Early pregnancy monitoring	1

1 Blastocyst Guarantee
Starting at 7.230€

Ovodon PLUS package: Included Services

Unlimited ultrasound monitoring during cycle	Unlimited
Unlimited hormone testing during cycle	Unlimited
Semen analysis + semen cryopreservation	1
Donor stimulation & retrieval (includes IVF lab)	1

Additional Services

Depending on your case, you may need the following services:

EMBRYO VITRIFICATION

You can freeze high-quality embryos from your cycle for use at a later date.

PERFECT MATCH

With this technology, we ensure the highest physical similarity between you and your donor using cutting-edge facial recognition software.

IA EMBRYOSELECT

Embryo selection with time-lapse and artificial intelligence. The most advanced embryo culture technology and artificial intelligence come together to select the embryo with the greatest reproductive potential, increasing your chances of pregnancy.

FROZEN EMBRYO TRANSFER

This service is offered when leftover embryos from a previous cycle are used in a new transfer.

*Medication not included in the cost of the treatment
*Ask about financing options

Genetic Counseling

We offer an innovative reproductive genetics service. In a dedicated consultation, our genetic specialists will explain how inherited diseases can be passed on and advise you on the most suitable reproductive options.

Personalized Treatment

IVI is a leader in top-quality, personalized assisted reproduction treatments. Our close and continuous follow-up throughout your treatment makes us a trusted name in the field.

Patient Portal

Through IVI's online Patient Portal, you can track your treatment from home and access updates whenever you need them.

Emotional Support

Alongside medical care, emotional support is essential to navigating infertility in the healthiest way possible. At IVI, our specialized emotional support team is available at every stage of treatment. Our goal is to create a safe space where you can speak openly about your concerns and focus on achieving emotional wellbeing.
